**Leading Term Life Distributor for Financial Institutions Chooses  
Realtime to Develop Agent eApplication Web Portal**

April 14, 2007 (Woodridge, IL) – Realtime Solutions Group LLC, the pioneer in e-business solutions and straight-through-processing software for life and health insurance, has been awarded a contract to develop a new business processing web portal for financial institutions using its innovative multi-carrier electronic quoting and Realtime eApplication™ technologies.

The solution will be developed for a leading writer of term life insurance products distributed primarily to bank clients. The technology will be used in a direct-to-consumer web portal and call center.

“The client came to us for an advanced online sales presence to better serve financial institution insurance agents and their customers,” said Gregg Antenen, president of Realtime. “The bank-branded consumer web portal and call center technology will help this distributor reduce processing time significantly, as well as lower the cost of policyholder acquisition through a higher rate of completed applications and more accurate risk information.”

For more information about this project and Realtime’s other innovative software solutions, please contact Craig Wolff, Director of Business Development, at 312.528.3738 or [cwolff@realtimesg.com](mailto:cwolff@realtimesg.com).

**About Realtime**

Realtime Solutions Group is the pioneer in developing straight-through-processing technology and providing innovative deployment strategies. Realtime STP™ is its industry-leading new business software platform, which is reducing costs and creating competitive advantage for Realtime clients. The Chicago-area company has also created Realtime eBusiness™ solutions.

Realtime eBusiness uses the sophisticated quote and apply technology from Realtime STP in a standalone solution. Modules include a New Business Web Portal that contains Realtime eApplication and Realtime eSignature, and an innovative Automated Application Evaluation module that automates field underwriting using online third-party data from Realtime Data Bureau™ with a rules-based decisioning engine. For more information about Realtime and its products and services, please visit its web site at [www.RealtimeSG.com](http://www.RealtimeSG.com).
